2 Pink Spinel Trillions 1.37 ctw. (5.6x5.6x3.1mm) - Natural  
94 Diamond Rd 0.80 ctw. (F+/VS+)

UNIQUE DESIGN TRAITS

Unique gemstone pairings - these earrings contain rhodolite garnet and pink spinels; and the feminine colors are further accented with 18K rose gold.

Color combination is bold and combines very fine examples of both gemstones; a hallmark of Omi Prive designs.

## GEMSTONE DETAILS

### Garnet

A mixture of two garnet types, almandine and pyrope, Rhodolite Garnet is beloved for its pinkish, purplish and/or purple-red color. Often described as raspberry color, rhodolite at its best has a velvety purple-red tone. Today most fine quality rhodolite is mined in Africa, although garnet is abundant throughout the world. A red garnet bead necklace was discovered in an Egyptian grave dating to 3800 B.C.E. Garnet in fact comes from the Latin word 'garanatus' meaning 'seed like' in reference to a pomegranate's red jewel-like seeds. Rhodolite specifically gets its names from the Greek work 'rhodon', which appropriately means 'rose colored'.

Garnet is the birthstone for January and the gift for the second wedding anniversary.

## GEMSTONE DETAILS

### Spinel

Centuries ago, in Sanskrit writings, spinel was called the daughter of ruby, adored, yet somehow different. The Crown Jewels of Great Britain are graced with spinels and have resided in the regalia of kingdoms throughout history.

Found in Myanmar (Burma), Sri Lanka and East Africa, spinel comes in a variety of colors including oranges, pinks, blues, lavenders, mauves and vivid reds. While common in sizes up to two carats, larger gemstones can also be acquired.

Spinel is thought to protect the owner from harm, to reconcile differences, and to soothe away sadness. However, the strongest reasons for buying a spinel are its rich, brilliant array of colors and its surprising affordability.

One of the most under-appreciated gemstones, spinel is coveted by collectors and gemologists for its range of hues and spectacular optical properties. Spinel was recently added as an official birthstone for August, raising its exposure to new heights. Recognized and prized for its hardness, brilliance, and unlike many other gem types, spinel is rarely treated or enhanced in any way. Many believe the name spinel comes from the Greek word for 'spark'. This name suits spinel well since it is a singularly refractive stone and is formed with cubic crystals similar to diamond, which gives this gemstone remarkable brilliance and fire.

Spinel is the birthstone for August and gift for the 22nd wedding anniversary.
