UNIQUE DESIGN TRAITS

Incredibly brilliant and vibrant purple garnets are expertly matched, example of top quality garnets in this color range.

Spinel is a remarkable gemstone, great for everyday wear and with exceptional brilliance, it is gaining widespread recognition as a sought after gemstone since it became an additional birthstone for August.

The setting allows for plenty of light to enter, so the garnets and spinels can best display its exceptional brilliance colors.

Fine details of craftsmanship, these earrings are manufactured through a process called 'pulled wire' as displayed by the gold wire frame. This process makes the metal far less porous than common casting techniques.

GEMSTONE DETAILS

Garnet

The garnet family of gemstones is scientifically classified as a "group," meaning that although the gems share the same atomic or crystal structure, they differ in their chemical makeup. For this reason, varieties of garnet will display certain distinct properties. Rarity of specific varieties within the group dramatically increases value compared to other garnets, such as demantoid, spessartine and tsavorite.

Garnet is the birthstone for January and the gift for the second wedding anniversary.

GEMSTONE DETAILS

Spinel

Centuries ago, in Sanskrit writings, spinel was called the daughter of ruby, adored, yet somehow different. The Crown Jewels of Great Britain are graced with spinels and have resided in the regalia of kingdoms throughout history.

Found in Myanmar (Burma), Sri Lanka and East Africa, spinel comes in a variety of colors including oranges, pinks, blues, lavenders, mauves and vivid reds. While common in sizes up to two carats, larger gemstones can also be acquired.

Spinel is thought to protect the owner from harm, to reconcile differences, and to soothe away sadness. However, the strongest reasons for buying a spinel are its rich, brilliant array of colors and its surprising affordability.

One of the most under-appreciated gemstones, spinel is coveted by collectors and gemologists for its range of hues and spectacular optical properties. Spinel was recently added as an official birthstone for August, raising its exposure to new heights. Recognized and prized for its hardness, brilliance, and unlike many other gem types, spinel is rarely treated or enhanced in any way. Many believe the name spinel comes from the Greek word for 'spark'. This name suits spinel well since it is a singularly refractive stone and is formed with cubic crystals similar to diamond, which gives this gemstone remarkable brilliance and fire.

Spinel is the birthstone for August and a gift for the 22nd wedding anniversary.
