100 Diamond Rds 0.46 ctw. (F+/VS+)

UNIQUE DESIGN TRAITS

Bright, 'bubblegum' pink sapphire center is a feminine and brilliant center stone, with pink sapphires gradually lightening in color, set down both sides of the gallery.

Set in a design worthy of the stone at its center, this ring dazzles with fancy and round brilliant cut diamonds.

An additional 0.90 carats of French cut diamonds add drama and intrigue to this truly one of a kind piece.

	
<b>GEMSTONE REPORT</b>	
EDELSTEINBERICHT RAPPORT DE PIERRE PRÉCIEUSE	
No.	GRS2018-112137
Date	21st November 2018
Object	One faceted gemstone
Identification	Natural Pink Sapphire
Origin	
Gemological testing revealed characteristics corresponding to those of a natural pink sapphire from:	
Madagascar	
	
Weight	10.10 ct
Dimensions	13.27 x 9.98 x 8.69 (mm)
Cut	modified brilliant/step (6)
Shape	oval
Color	vivid pink

GEMSTONE DETAILS

Pink Sapphire

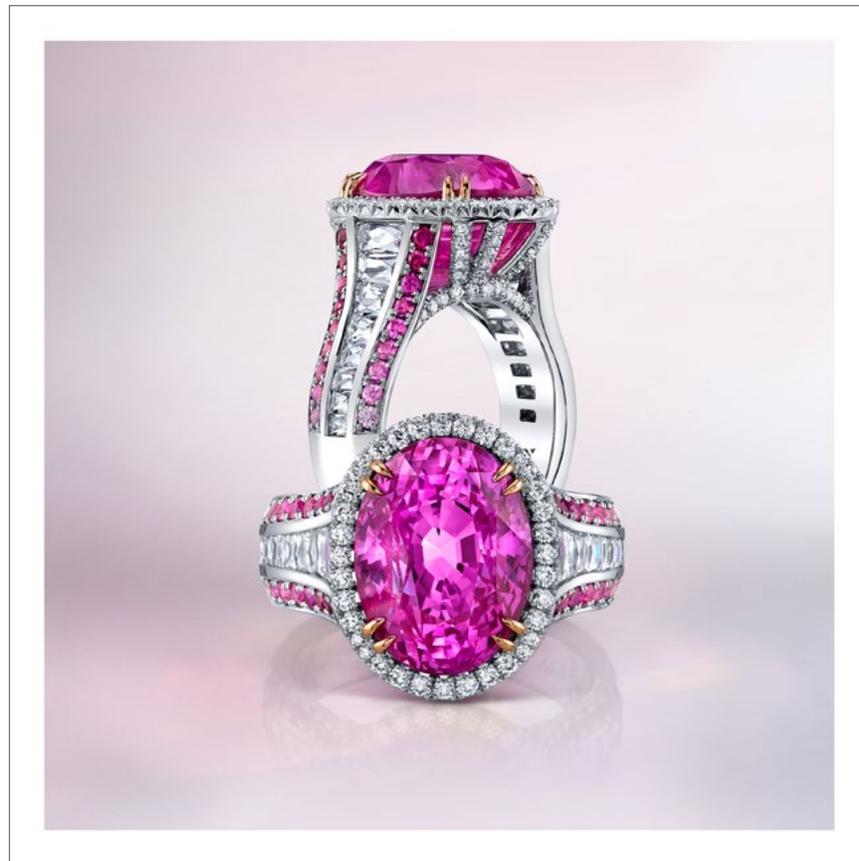

Lighter in tone than ruby, but no less brilliant, pink sapphire is a modern descriptor. Pink is not a distinct hue, it is in fact, a light-toned pale red. But pink sapphires and rubies are considered two different gemstones. Color plays a vital role in this distinction.

Like rubies, pink sapphires are often modified by secondary hues. When pink and orange are present in a stone, the color might produce a padparadscha sapphire, but when pink is modified by the addition of purple, stones could appear "hot pink," "fuchsia" or "magenta."

For this reason, pink sapphire encompasses a wide range of color saturations, from pale blush tones to rich deep purple pink.

In the late 1990s, a deposit was discovered in Madagascar making pink sapphires more available, having previously only been mined in limited locations, including Sri Lanka and Myanmar.

Sapphire is the birthstone for September and the gem of the 5th and 45th anniversaries.
