PINK SAPPHIRE & DIAMOND 3-STONE RING

Platinum ring featuring a 9.77 carat cushion pink sapphire accented by 0.70 carat total weight of trapezoid-cut diamonds and 1.60 carat total weight of round diamonds.

omiprive.com

UNIQUE DESIGN TRAITS

This center pink sapphire displays highly desirable vibrant pink over 9 carats in size.

Accompanied by an American Gemological Laboratories Report stating Sri Lankan or "Ceylon" origin, one of the oldest sapphire mining locations in the world.

To emphasize the magnificence of the center stone, this ring was designed in a classic 3-stone style with very fine custom trapezoid-cut diamonds on each side all encompassed by a halo of round diamonds.

Exceptional platinum craftsmanship can be seen in the hand-drilled and hand-set French pavé work, where very little metal is visible.

Diamond accents under the center pink sapphire are in a feminine scallop design, a special treat for the wearer, which adds significance and depth to the large center stone.

GEMSTONE DETAILS

Pink Sapphire

Lighter in tone than ruby, but no less brilliant, pink sapphire is a modern descriptor.

Pink is not a distinct hue, it is in fact, a light-toned pale red. But pink sapphires and rubies are considered two different gemstones. Color plays a vital role in this distinction.

Like rubies, pink sapphires are often modified by secondary hues. When pink and orange are present in a stone, the color might produce a padparadscha sapphire, but when pink is modified by the addition of purple, stones could appear "hot pink," "fuchsia" or "magenta." For this reason, pink sapphire encompasses a wide range of color saturations, from pale blush tones to rich deep purple pink.

In the late 1990s, a deposit was discovered in Madagascar making pink sapphires more available, having previously only been mined in limited locations, including Sri Lanka and Myanmar.

Sapphire is the birthstone for September and the gem of the 5th and 45th anniversaries.

Comments:

General Report Comments:

Document No: CS 1075883 Validation Date: 24 May 2016

Identification
Mineral Type: Natural Corundum
Variety: Pink Sapphire
Color Description: Purplish Pink

Carat Weight: 9.77 cts
Measurements: 11.62 x 10.16 x 8.94 mm
Shape: Cushion
Cutting Style: Mixed Cut

Comments:

Origin

Provenance: Ceylon (Sri Lanka)

Comments: Based on available gemological information, it is the opinion of the Laboratory that the origin of this material would be classified as Ceylon (Sri Lanka).

Enhancement

Standard: Low temperature heating
Degree: N/A
Type: N/A
Stability Index: Color Stability: Excellent

Additional: Clarity enhancement: None
Degree: N/A
Type: N/A
Stability Index: N/A

Comments: Gemological evidence of relatively low temperature heating. Pink sapphires are commonly heated to modify their color and appearance. N/A represents Not Applicable.

American Gemological Laboratories™

America's first and most highly respected origin lab.

Founded in 1977,

AGL is an internationally recognized gemstone testing facility, specializing in comprehensive colored stone analyses.

AGL has the distinction of being the first laboratory in the United States to issue Country-of-Origin reports. Our company and its principals have a long tradition of research into the detection of and reporting on gem identification-and-classification, gemstone treatments and provenance determinations.

Our staff is composed of experts in the field of gemstone testing and reporting. Our findings reflect the latest knowledge and analytical techniques to ensure the highest standards are applied on every stone we test.

AGL's testing and reporting methodology provide you with unsurpassed quality and reliability. We are committed to providing the highest level of service and reporting that our clients and the industry have come to expect from the AGL.
